

# DETER. DETECT. DELAY. DENY.

Transcend Security's solar-powered **s360 Standard Mobile Surveillance Unit** is a low-cost alternative to physical security guards and a more secure option than periodic security vehicle patrols.

Operating 24/7 and monitored by the Transcend Security Operations Center, our mobile surveillance units are equipped with best-in-class software, cameras, and video management system, providing peace of mind that's accessible anywhere.

## KEY FEATURES

Each unit is equipped with the base features described below.

- A 360°, Multisensor camera with four (4) 5MP image sensors and 2.5x optical zoom.
- Intrusion detection with two (2)-way, one (1)-click horn speaker.
- Extendable 25-foot mast with 360° viewing potential.
- A built-in, 1440 total wattage four (4)-panel solar array.
- Two (2) 40K lumen "Set-and-Forget" LED lights.
- Controls for built-in battery monitor, light switch controls, and solar array adjuster.
- Rapid deployment with 4G connectivity, eliminating the need for Wi-Fi connection.
- Optional Starlink Internet available.

## MONITORING FEATURES

**Analysts live monitor Monday-Friday from 6:00 PM to 6:00 AM and for 24 hours on weekends.**

Our standard monitoring services consist of the four levels below.

**Incident-based monitoring**— After-hours monitoring of incident-based alerts through the TSOC.

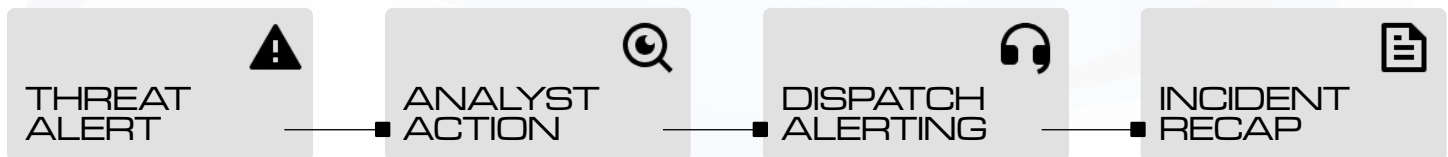

**After-Hours Virtual Tours**— Scheduled virtual property tours and activity reports.

**Passive Capture**— General camera recording and capture from cameras.

**Defined Incident**— Specific events and People or Vehicle(s) of Interest monitoring.

## ALARM VALIDATION STANDARD

The Alarm Validation Scoring Standard **ensures incidents are responded to appropriately and quickly** by emergency services or law enforcement.

**Alarm Levels 2**— for Unknown Intent Intruders. Analysts request emergency dispatch and communicate a Level 2 alarm is in progress.

**Alarm Levels 3**— for Threat Intent Intruders. Analysts request emergency dispatch and communicate a Level 3 alarm is in progress.

**Alarm Level 4**— for Imminent Threats. Analysts confirm there is a threat to a person's life, request dispatch, and communicate a Level 4 alarm in progress. Emergency Services or Law Enforcement are dispatched with the highest prioritization.

## ANALYTICS & NOTIFICATIONS

Limitless searchable analytics— **Analysts can search footage for specific attributes based off queries.**

### People Analytics

Filter through detected faces and objects and set People of Interest.

### Interest Notifications

Alert triggers for when a Person or Vehicle of Interest enters or exits a camera's field of view.

### Vehicle Analytics

Browse, cross-search, and filter snapshots of detected vehicles.

### Motion Notifications

Trigger alerts when people are in a space within a certain time and view their trajectories.
